

STEREO tape recorders

by **WEBCOR**

SEP 30 1958

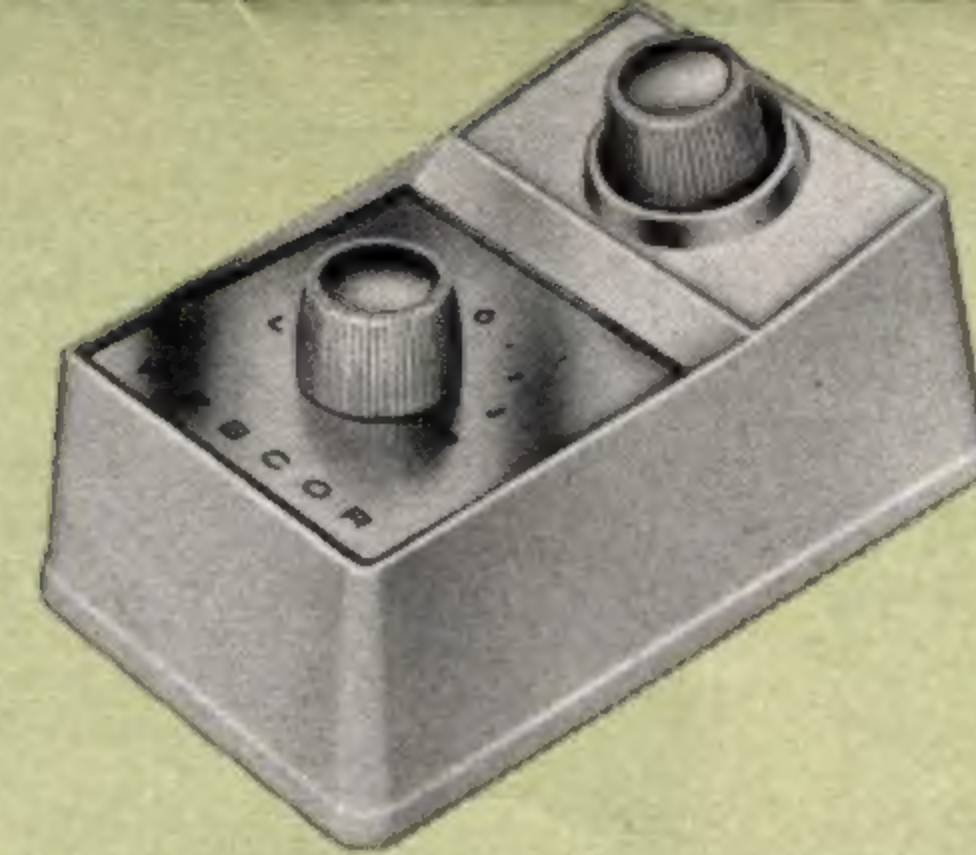

new 1959 **WEBCOR stereofonic tape recorders**

No other tape recorders made today offer the quality of reproduction provided by the 1959 Webcor Stereofonic Tape Recorders! These new Webcor models literally reproduce music from the new stereo tapes with the true, full-dimensional values you'd hear if you were present at the original concert or recording session.

Any attempt to describe this thrilling music is, of course, entirely inadequate. *You must hear it to realize* such music reproduction is actually possible!

exclusive WEBCOR "no reel-turnover" feature

Most Webcor Tape Recorders have two Webcor precision-built motors and two recording heads. Hence, the operator can record and play back for three full hours without reversing reels. Webcor Stereofonic Tape Recorders have this feature for monaural operation—are the only stereo instruments which offer this most desirable convenience.

new **WEBCOR "aural balance" remote control unit** Model A-2951

The convenience offered by the new Webcor Stereofonic High Fidelity Tape Recorders is second only to the marvelously realistic sound reproduction they provide. Webcor engineers have concentrated on keeping these fine instruments as simple as possible to operate. And probably one of the greatest convenience developments in stereofonic tape recorder history is the exclusive new Webcor "Aural Balance" Remote Control. This amazing remote control unit—another Webcor first—actually permits the listener to balance sound and adjust the audio level in both speakers from anywhere in the room! Only Webcor offers this wonderful feature.
